Like many people, I also began my love for oat groats as a child. Growing up, my father was a great cook and he always made us oat groats for breakfast. I remember those days, when I would sit down in my father's kitchen with a bowl of oat groats watching him mix them with water and sometimes sugar. He would say "Hello, my little oat groats" and I would say "Hi, Daddy" just like my Grandmother used to tell me before I went to bed. On those mornings, I would always ask for "more oat groats" and I would get it right away with a tall glass of milk. I especially liked making them with my mother, who taught me that oat groats were a simple and nutritious food for people of all ages. I was her little oat groats, and I loved her cooking. I believe in the old saying of "You are what you eat" and my grandmother's oat groats were always "real tasty". I believe that it is important to include nutritious foods in the "Bread and Butter" of every day life for people of all ages. I also believe that you should love the foods you eat and this is especially true for children. I know that my grandmother is looking down on me today and wants me to love all the foods she loved to make and eat. I am a Registered Nurse and a Certified Medical Aide, and I worked in a Children's Hospital until I was forced into early retirement due to health issues. I also taught Montessori classes in the Montessori model. This has influenced me so much as an educator and a teacher to cherish all the children in my classroom and learn to appreciate their differences. I'm an d0c515b9f4
